

**October-November 2006**

## **Petition**

We the undersigned formally oppose the proposed **Robertson's Redi-Mix** batch plant at 2847 Industry Street and respectfully request the recent Planning Commission approval be overturned and the project be rejected.

We are opposed for the following reasons:

**Hours of operation:** Oceanside Planning Department has approved hours of operation from 6:00 AM to 9:00 PM

**Noise:** Concrete plant will create significant noise in early hours and late evenings

**Traffic:** estimated truck and trailer traffic in excess of 400 trips per day. Oceanside Blvd. designated as "smart growth" / high density corridor.

**Degradation to streets:** Large trucks with trailers will impede traffic on Oceanside Blvd. and adjoining streets, cause additional dust and noise

**Failure to adequately address potential impact on Loma Alta Creek and potential ecological damage:** No E.I.R. was required prior to planning Commission approval.
