RE: Traffic Circle at South Barnwell and Corto Street

Dear Mr. Root:

The City of Oceanside is moving forward with the design of the traffic circle for South Barnwell at Corto Street. In February 2005, Transportation Commission approved the installation of a traffic circle to slow traffic along South Barnwell. Staff presented the project to the LOMA ALTA Neighborhood Association meeting in March 2005 with a full support from the community.

At this time, we are completing the design of the traffic circle that includes landscaping and placement of the LOMA ALTA sign. As mentioned, we are in full support of installing a gateway sign within the traffic circle. The sign will be installed as part of the traffic circle project.

The Public Works Transportation Division appreciates your support on traffic concerns and the installation of the traffic circle. If you have any further questions, please call me at 435-5082 or Ms. Cindy Watson, project manager at (760) 435-3529.

Sincerely,

Frank Watanabe
Deputy Public Works Director/
Transportation Manager
